

UȘI CULISANTE CU RIDICARE

Tâmplărie pentru o viață

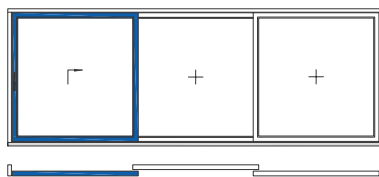

DETALII TEHNICE

Material	RAU-FIPRO: PVC ranforsat cu fi bre, RAU-PVC, nu conține cadmiu și plumb
Material de etanșare	RAU-SR, RAU-PREN (negru, gri)
Adâncime constructivă ramă/canat	203 mm / 86 mm
Dimensiune maximă canat	H 2400 mm / L 2500 mm
Număr de camere	5
Grosime maximă vitraj	53 mm
Grosime vizibilă ramă/canat	63 mm / 97 mm
Greutate totală maximă canat	400 kg
Coeficient de transfer termic Uf	până la 1,3 W/m ² K
Rezistență la presiunea vântului	până la clasa B3 conform DIN EN 12210
Etanșeitate la averse	până la clasa 9A conform DIN EN 12208
Permeabilitate la aer	Clasa 4 conform DIN EN 12207
Funcționare permanentă	Clasa 2 conform DIN EN 12400
Izolare fonică	până la R _{w,P} = 42 dB
Protecția antiefracție	până WK 2 conform DIN V ENV 1627
Înnobilarea suprafețelor	Înfoliere cu modele de lemn și culori RAL, capace din aluminiu

Designul special al canaturilor

Canatul și rama sunt într-un singur plan și au suprafețele HDF.

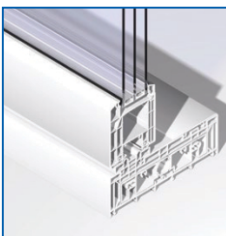

Carcasa mecanismului de glisare

Noua forma a carcasei asigura montarea perfecta și funcționarea sigura și ușoara a feroneriei, protejând-o de intemperii.

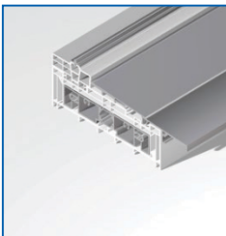

Armarea ramelor

Armatura din aluminiu cu bariera termica izoleaza foarte eficient. Canalele pentru șuruburi permit montarea oricarui tip de prag.

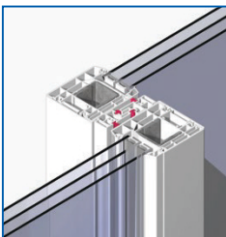

Adâncimea falțului

Se pot monta pachete de sticla cu grosimi pâna la 53 mm.

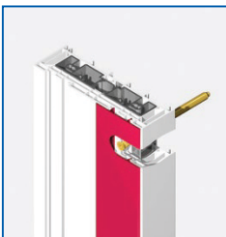

Praguri plate

Pragurile se încadrează în cerințele construcțiilor fara obstacole (max. 20 mm diferența de nivel).

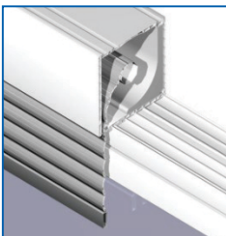

Închiderea mediană

Profilele speciale asigura etanșeitatea perfecta între panouri, per mițând și realizarea panourilor în culori diferite (interior / exterior).

Montaj

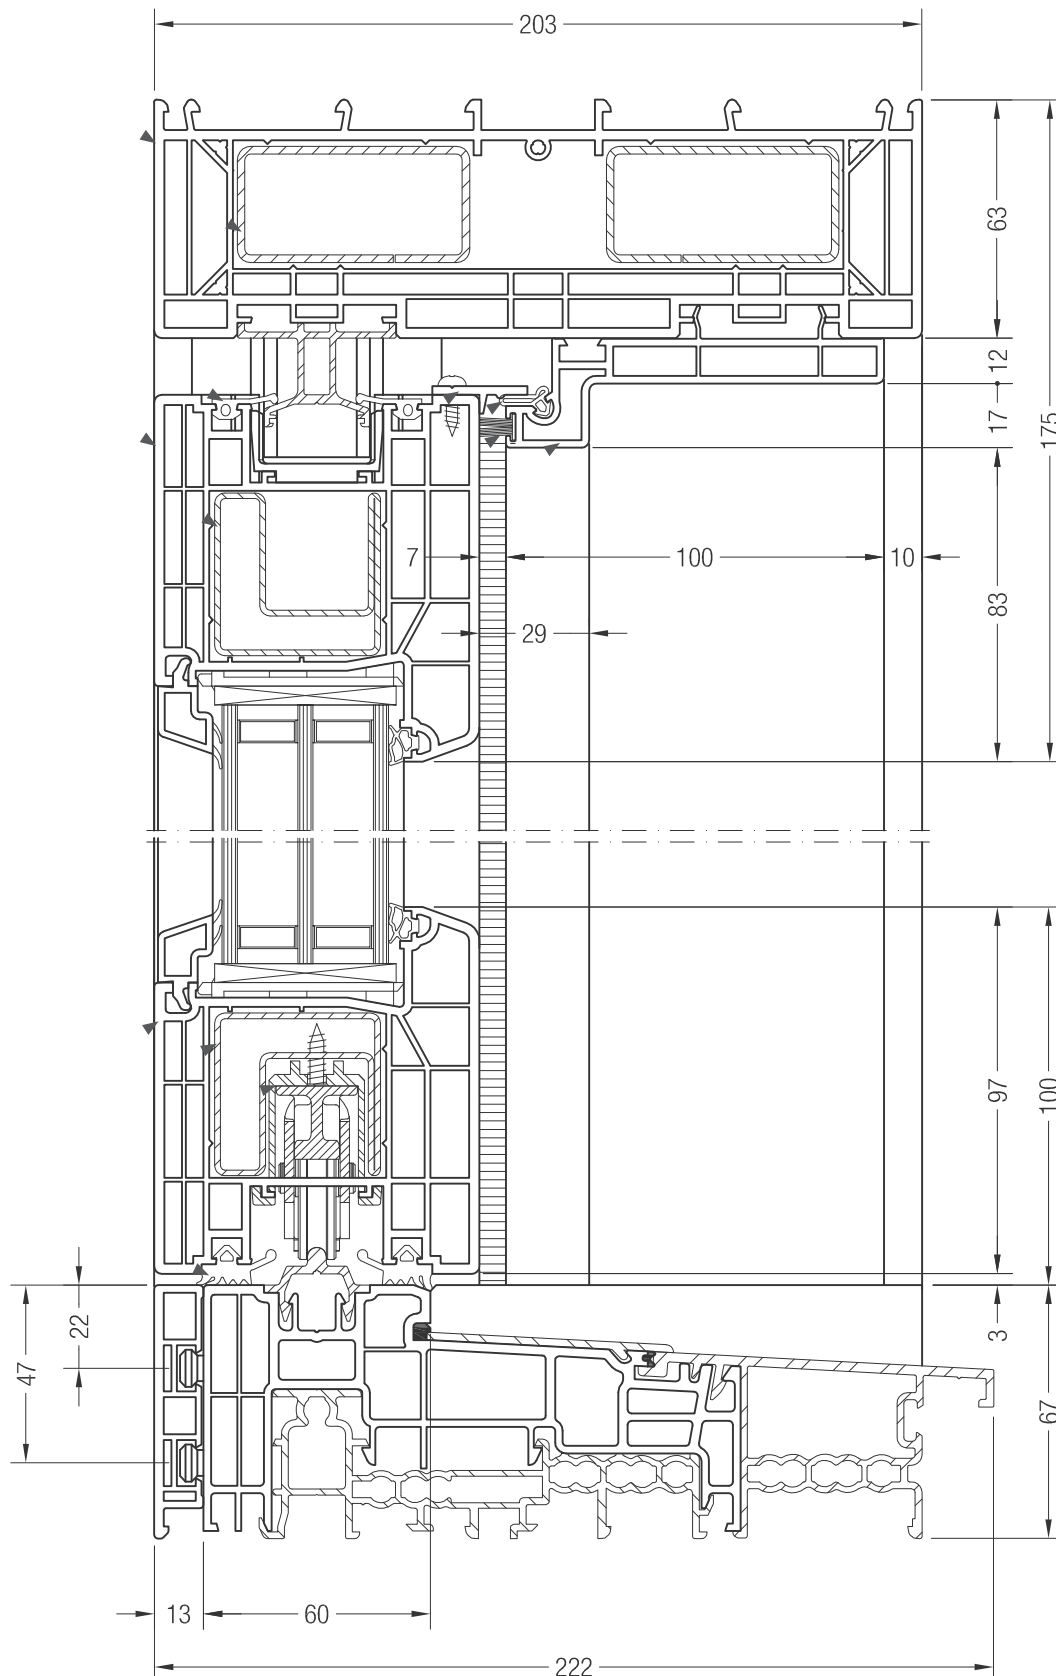

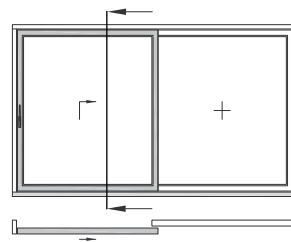

Elementele de fixare sunt mascate de profile de sistem standardizate.

Casetă pentru rulouri

Canatul și rama sunt într-un singur plan și au suprafețele HDF.
